Question #3Topic 1

You create a Power Apps portal to provide training and documentation for students. Students create a profile on the portal and then select and pay for courses.

You plan to add free courses to the training portfolio. Free courses must be automatically available to all students when they sign in.

You need to assign default permissions to students.

What should you do?

- A. Create a Students web role and set the Authenticated Users Role option to true. Assign the web role to each registered user.

- B. Create an entity for managing free courses. Create entity permission records to provide access to entity records for free courses and assign the entity permissions to users when they register on the portal for the first time.
- C. Create an entity for managing free courses. Create a Students web role and set the Authenticated Users role option to true. Create appropriate entity permissions to access the free course entity records and assign the entity permissions to the web role.

Correct Answer: A
